- ① Name in Description 1 (material name) exported as is (sample: LX_MRPB18_ALASKAN_NF)
- ② Name in Description 1 (material name) exported colour first (sample: ALASKAN_NF_LX_MRPB18)
- ③ Tick if you are interested in a matching import in WOODSTORE (board storage system)
- ④ Tick if you are interested in a matching import in CUTRITE (saw and/or nesting optimiser)

⑤ The cost listed are for the extension for one target system.

If you need the integration in WOODSTORE and CUTRITE you only require to tick WOODSTORE as CUTRITE can update the library direct.

If you require the extension for Homag iX and CUTRITE (or Homag iX and WOODSTORE), tick both options and the cost will apply twice.

NA The Edge Libraries are not available for a board storage system and are not needed for CUTRITE.

Hardware (Fittings / Connectors / Appliances / Installation)

This section lists available library extension for Fittings (hardware like storage and organisation solutions), Connectors (including drawer systems, sliding and folding door solutions, flap door solutions and so on), Appliances (sample appliances like ovens, dishwashers, microwaves, hot plates, sinks, but also wash basins for vanities) and installation (power points, light switches, gas outlets and so on).

These library extensions include the required machine operations (so far known) and 3D AutoCAD drawings for visualisation (in some cases not in all details to avoid memory usage and performance issues by adding huge detailed 3D drawings). Hardware is be listed with local order code (not for generic samples, but all supplier related extensions) and price/cost as \$0 to be updated by you based on your cost price.

Some of the library extension will contain sample cabinets. This cabinets are designed using the new IMOS iX default library (made by IMOS Australia for the local market). To add the hardware to your existing cabinets which don't use our default design (designed from other parts, part definitions, variables) we strongly recommend to not import the sample articles to avoid the addition of new variables, parts, part definitions (and articles) which don't suit your customised library.

HETTICH

Hettich Fittings for Corner Cabinets

This library extension contains the hardware for the following corner cabinet fittings, but also sample cabinets using the IMOS iX Design defaults (see above).

Included are (see screenshots from Australian Hettich catalogue below):

- Corner Unit Pull-Out System Moving Corner
Note:
 - used only the Classic version in Silver for ordering, but that can be easy changed/extended
- Corner Unit Pull-Out System LeMans
Note:
 - used only the Classic version in Chrome for ordering, but that can be easy changed/extended
 - (integrated from Kesseboehmer LeMans II library extension as this product is manufactured by Kesseboehmer and sold in Australia from multiple local suppliers).
- Corner Unit Pull-Out System Semi-Circle Revolving Shelves
Note:
 - used only the Classic version in Chrome for ordering, but that can be easy changed/extended
- Corner Unit Pull-Out System Three-Quarter Circle Revolving Shelves
Note:
 - used only the Classic version in Chrome for ordering, but that can be easy changed/extended
- Folding Door Corner Unit Revo 90°
Note:
 - used only the Classic version in Chrome for ordering, but that can be easy changed/extended

Interior fittings for base units
Corner unit pull-out system
Moving Corner

- Integrated soft closing system
- Optimum utilisation of space giving full access to provisions stored in the corner unit
- Suitable for 900 and 1000 mm corner unit widths using the simple click-in adjustment facility function for the extension fitting
- Minimum internal cabinet depth 500 mm
- Minimum internal cabinet height 540 mm
- With full-extension mounted in ball bearings
- Matching clip-on shelves and baskets see page 9.1.20
- Plastic-coated steel

BLUM

Blum Legrabox Box Sets from Wilson & Bradley

While we offer a complete BLUM library extension – this library extension contains all connectors involved in drawer systems, but no box sets with matching rules/characteristics.

The BLUM Legrabox Drawer System is offered by Wilson & Bradley (and Lincoln Sentry) as complete Box Sets under their own order codes.

This library extension is based on the complete list of Blum Legrabox Pure and Blum Legrabox Free Box Sets offered as Blumotion Standard & Inner Drawer and as Blumotion TIP-ON Standard & Inner Drawer (but not the special drawer range [Sink Drawer / Space or Space Twin Drawer and neither Waste Bin Drawer).

The Connector Sets are using characteristics to pre-select the Drawer System (LEGRABOX FREE or LEGRABOX PURE), the colour of the Drawer System (SILK WHITE / TERRA BLACK / ORION GREY / STAINLESS STEEL) and the drawer type (STANDARD or INNER DRAWER). They include rules to select the right drawer for a 450/600/900/1200 mm wide cabinet if the drawer has the matching glass front element (LOW or HIGH) and the minimum drawer height required is entered as well, but smaller system are allowed for higher space (instead of automatically selecting the next higher system if it's fits).

The database extension is based on the Box Sets listed on the Wilson & Bradley homepage in January 2021 and contains in total 1994 Box Sets.

See <https://www.wilbrad.com.au/shop/categories?kcid=177&name=Blum-LEGRABOX-pure> :

The screenshot shows the Wilson & Bradley website interface. At the top, there is a navigation bar with the company logo and various utility links like 'Search', 'Log in', and 'Basket'. Below the navigation, a sidebar on the left lists product categories such as 'Specials', 'Blum Products', 'Standard Drawers', and 'INNER Drawers'. The main content area features a 'FEATURE PRODUCT RANGE - SIGE PRO LINE' banner with a 'Show Now' button. Below the banner, the 'Blum LEGRABOX pure' product is highlighted, with a description: 'Experience elegance with Blum's LEGRABOX box system. This elegant box system is unsurpassed in its level of performance and can be characterised by its slim design, straight lines and particularly high quality of motion.' A list of drawer options is provided, each with a small image and the Blum logo:

- Standard Drawers
- INNER Drawers
- Special Application Drawers
- Standard Drawers with TIP-ON BLUMOTION
- INNER Drawers with TIP-ON Blumotion
- Special Application Drawers with TIP-ON BLUMOTION

OVVO

Connector System V-930/V-1230/V-1240

Ovvo Connectors to improve productivity, assembly time, flat pack delivery and design (hidden connector).

Watch Introduction Video on Youtube (<https://www.youtube.com/watch?v=kT7hLYwgUzc>) [search for "Ovvo Connectors Intro"]

The Interzum "Best of the Best" award-winning invisible OVVO® Connection System delivers perfectly aligned joints without the use of tools or glues.

OVVO® works best in board thickness of $\geq 12\text{mm}$ and is available in a range of sizes to perfectly match your requirements.

All sizes are available in both PERMANENT and RELEASABLE options, extending the range of material and opportunities to inspire creative design and development.

V-1230

V-0930

How OVVO® works:

- Each connection set consists of a connector and two housings
- The **patented dovetail design** of the connector delivers intrinsic tolerance and superior shear and tensile strength to the joint created
- The connectors are designed to work **across a range of joint angles**
- OVVO® is compatible with all major CNC equipment and software downloads are available to easily integrate OVVO® into your process, delivering very accurate connections and perfect alignment

Benefits:

- Fast, simple on-site assembly process — Significantly reduced installations times benefiting you and your customers
- Increased production efficiencies
- Reduced shipping costs

"Our company recently completed a major refurbishment of 70 bedrooms in a prominent city centre hotel. The OVVO® connection system was used throughout and helped us achieve very efficient installation and assembly on-site". - James Foley, Operations Director, DFL Fitout & Joinery Ltd, Ireland.
